if simply snapping in the infinity gauntlet wiped out half of life, what woul...

happyhopeful24

-dabbed
-whipped
-nae nae-d
-yote
-did the spiderman thing
-flossed
-flossed but for dental health
-had a breakdown
-had a crisis
-*jazz hands*

but most importantly

what if thanos did the macarena

37

happeh

people come into our lives for a reason
bringing something we must learn
we are led to those who help us most to grow
& we help them in return
i don't know if i believe that's true
but i know i'm who i am today
because i knew you

if simply snapping in the infinity gauntlet wiped out half of life, what woul...

sapphirespy55

if thanos did the Macarena we'd all be doomed. Not just half of us. All of us.

You know what I thought was really interesting was that whenever the time stone is used, the user gets the green-glyph-glove and has to use the specific hand turning motion to reverse time. That never happens for the other stones — they just glow when Thanos closes his fist and do their thing. It makes sense that when Doctor Strange uses the stone, it does that, because he was taught how to use it with a book of magic, so of course his way of manipulating the time stone would look like all the other magic he uses. However, when Thanos uses the stone, he has to do the same exact thing (besides, of course, the hand motions for opening the Eye of Agamotto, where Strange keeps the stone, because the time stone is in his gauntlet when Thanos uses it). I think that this indicates that the infinity stones are, at least, partially sentient (or, at least, have somewhat of a memory), and that the time stone remembers being used in the green-glyph-glove method and prefers it, or at least is more comfortable or prone to that method.

In the comics, specifically Infinity Wars/Warps (2018), the infinity gems (stones?) are, in fact, sentient, so there's that too

Of course, the time stone could just be special in its activation method, Thanos could've learned how to use the time stone by reading books of sorcery, or perhaps Agamotto himself placed a spell on it or something so that it can only be used in that manner. This is just speculation, but I think that it's an interesting idea!

I want to know why Earth is so lucky. Half of the universe and Earth, such a miniscule part of it, somehow wasn't included.

Huh.

sapphirespy55

actually reflecting on my earlier comment, every time he'd hit himself he'd wipe out half of life, then half of what's left, and so on and so on until the last few people are begging that he'll just stop already because d3adly Macarena is a Purely Horrible thing and is 100% most awful t0rture ever

I have officially screenshotted that and will draw my interpretation of it. It is one of the few precious things I have deemed worthy of the screenshot.
